

SauceDemo Launch Readiness Report

saucedemo · <https://www.saucedemo.com/>
2026-08-29

80 / 100

LAUNCH WITH CONDITIONS

Executive summary

Standard-user authentication, catalog, cart, checkout, session, and cross-browser smoke flows completed successfully. Launch should proceed only after addressing the keyboard-inaccessible cart control, with semantic, mobile-spacing, and route-response defects tracked as follow-up conditions.

Launch readiness score

Category	Weight	Status	Earned	Rationale
core-flows	40	PASS	40	Standard login, catalog, cart, checkout, logout, and cross-browser purchase smoke flows completed.
reliability-error-handling	20	PASS	20	Invalid login, locked account, checkout validation, session protection, and cart-state checks behaved consistently.
ux-content	15	PASS	15	Standard journey labels, product content, error copy, and purchase progression were understandable.
responsive	10	WARNING	5	The 390x844 flow works without horizontal overflow, but oversized cards make catalog scanning inefficient.
accessibility-smoke	10	FAIL	0	The cart control is not keyboard focusable and inventory lacks a main landmark and level-one heading.
network-health	5	FAIL	0	Reloading the supported inventory route returns HTTP 404 and produces a browser console error.

Critical flows

ID	Flow	Status	Evidence
AUTH-001	Standard user can log in	PASS	Successful desktop and cross-browser login-to-inventory checks.
CATALOG-001	Shopper can review and sort inventory	PASS	Six products loaded and price-low-to-high sorting was verified.
CART-001	Cart state remains accurate	PASS	Two-item state survived reload and removal produced the correct remaining item.
CHECKOUT-001	Shopper can complete checkout	PASS	Standard purchase completed in Chromium desktop/mobile, Firefox, and WebKit.
SESSION-001	Logout protects the authenticated session	PASS	Logout returned to login and protected direct inventory access.

Verified readiness findings

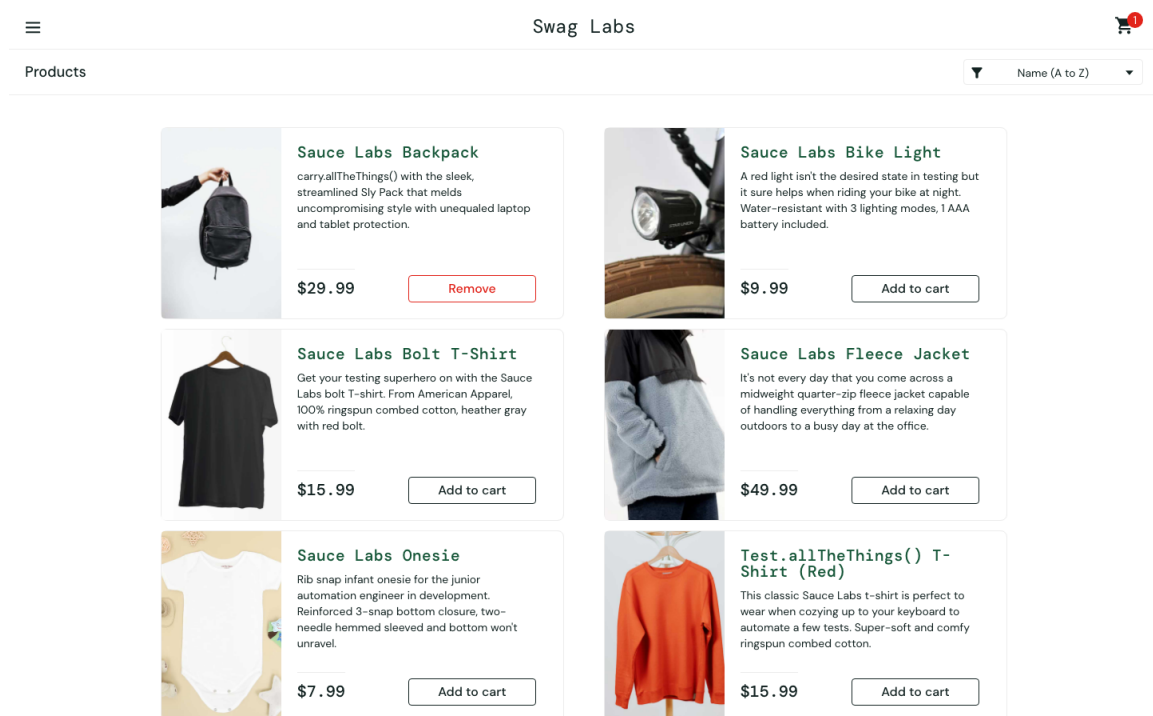

Major

SD-A11Y-002 · Cart link cannot receive keyboard focus

Environment	public-demo
Browser / device	Chromium desktop 1440x900
Expected	The cart control participates in focus order and opens the cart when activated.
Actual	Add to cart supports keyboard activation, but the cart link remains unfocused and cannot be keyboard-activated.
Recommendation	Render the cart as a real anchor with href or an equivalent keyboard-focusable control with correct semantics.

Reproduction

1. Log in as standard_user.
2. Add a product using the keyboard.
3. Attempt to focus and activate the cart link using the keyboard.

Evidence: artifacts/runs/20260829T062003Z-saucedemo-desktop-chromium/test-results/tests-saucedemo-test-authentication-py-test-inventory-primary-controls-support-keyboard-activation-chromium/trace.zip

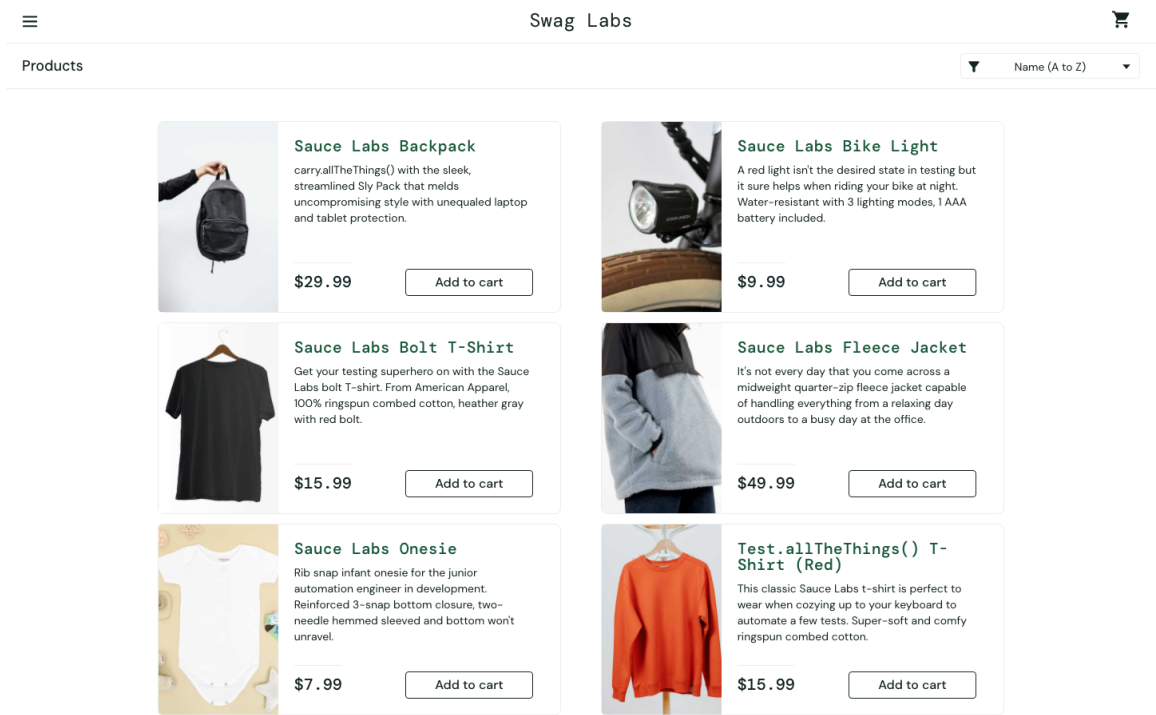

Minor

SD-A11Y-001 · Inventory lacks primary semantic landmarks

Environment	public-demo
Browser / device	Chromium desktop 1440x900
Expected	The inventory exposes exactly one main landmark and one level-one heading.
Actual	The page exposes no main landmark and no level-one heading.
Recommendation	Wrap primary inventory content in a main landmark and expose Products as the page H1.

Reproduction

1. Log in as standard_user.
2. Open the product inventory.
3. Inspect the document landmarks and heading hierarchy.

Evidence: artifacts/runs/20260829T062003Z-saucedemo-desktop-chromium/test-results/tests-saucedemo-test-accessibility-py-test-inventory-has-basic-semantic-landmarks-chromium/trace.zip

MinorSD-NET-001 · Reloading inventory returns HTTP 404	
Environment	public-demo
Browser / device	Chromium desktop 1440x900
Expected	The active application route reloads with HTTP 200 and no console error.
Actual	Inventory remains usable and cart state persists, but the document response is HTTP 404 and produces a console error.
Recommendation	Configure the host to serve the application shell with HTTP 200 for supported client-side routes.

Reproduction

1. Log in as standard_user.
2. Add two products to the cart.
3. Reload inventory.html.
4. Inspect the response and browser console.

Evidence: artifacts/runs/20260829T062003Z-saucedemo-desktop-chromium/observability/tests-saucedemo-test_inventory_cart.py-test_cart_state_survives_reload_and_remove-chromium.json

Minor

SD-RESP-001 · Mobile product cards contain excessive vertical whitespace

Environment	public-demo
Browser / device	Chromium mobile 390x844
Expected	Mobile cards keep related content compact enough for efficient catalog scanning.
Actual	Large empty areas separate descriptions from prices and actions, expanding the six-product page to 5,349 pixels.
Recommendation	Remove fixed or oversized card heights on narrow screens and let cards size to their content.

Reproduction

1. Log in as standard_user at a 390x844 viewport.
2. Scroll through all six inventory products.
3. Compare the description, price, and action spacing within each card.

Sauce Labs Backpack

carry.allTheThings() with the sleek, streamlined Sly Pack that melds uncompromising style with unequaled laptop and tablet protection.

\$29.99

Browser and device coverage

Profile	Browser	Device	Suite	Result
desktop-chromium	Chromium	Desktop 1440x900	full	10 passed, 3 evidence-backed failures
mobile-chromium	Chromium	Mobile 390x844	smoke and responsive	2 passed, 1 manual UX warning
desktop-firefox	Firefox	Desktop 1440x900	purchase smoke	2 passed
desktop-webkit	WebKit	Desktop 1440x900	purchase smoke	2 passed

Network and console observations

- events.backtrace.io placeholder telemetry returned authorization noise and was excluded as non-blocking third-party demo traffic.

Limitations

- This audit covers the public demo environment and its published test personas only.
- Accessibility coverage is a semantic and keyboard smoke assessment, not a WCAG conformance audit.
- Security, load, backend API, payment integration, and assistive-technology testing are outside scope.

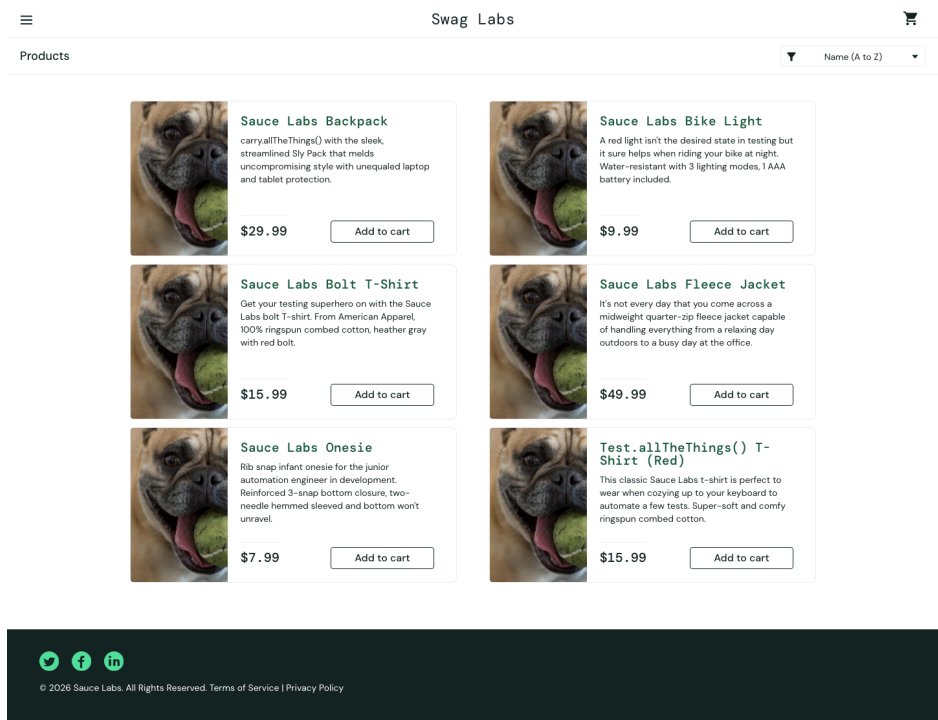

Detection Demonstration

Seeded faulty personas prove the suite can detect material defects. The following findings are excluded from the standard-user readiness score.

Major	SD-DEMO-001 · Problem user reuses one incorrect image for every product
Environment	public-demo
Browser / device	Chromium desktop 1440x900
Expected	Each product displays its corresponding product image.
Actual	All six products display the same dog image.
Recommendation	Preserve this seeded persona for detection demonstrations; do not include it in standard-user readiness scoring.

Reproduction

1. Log in as problem_user.
2. Compare the six inventory product images.
